DETAILED ACTION

EXAMINER'S AMENDMENT

Please enter the amendment to the claims found in "Attachment A".

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Permut on May 11, 2006.

Allowable Subject Matter

Claims 1-7 and 13-20 are allowed.

In regard to Claims 1, 18, & 19

- Claims 1, 18, & 19 recite the limitation of starting and stopping a vehicle engine including checking three conditions, the voltage of a battery below a specified limit, the temperature of the engine below a specified limit or that the temperature of a cab is outside predetermined range and if any of these conditions exist, then the engine is started. Although prior art teaches checking these conditions (See Hanson et al. US 5,317,998), prior art fails to teach checking all three conditions and starting an engine if a positive indication is received from any of the conditions.
